Vidit Gupta

v92gupta@uwaterloo.ca +1 780-655-9933 linkedin.com/in/viditgupta6 Portfolio

Education

University of Waterloo Aug 2024- Apr 2029 (Expected)
Mathematics and Computer Science (Co-op)

Skills

Languages: Python, C/C++, JavaScript/TypeScript, Ruby, Swift, SQL, HTML/CSS
AI / ML: LLMs (OpenAI, Anthropic, Gemini, Grok), RAG & vector search, prompt engineering, LangChain
Software & Testing: React, Next.js, React Native (Expo), Node.js, FastAPI, Rails, GraphQL, Tailwind CSS, Playwright, Jest, Cypress
Tools & Infrastructure: Git, Docker, Linux, Bash, CI/CD, AWS, PostgreSQL/Supabase
Data & Reporting: Excel VBA, Power Query, Power BI, SAP, Hyperion

Work Experience

Software Engineer & Test Automation Engineer 2026 | N*ew York(Remote)*
Stealth Financial Blockchain Startup

- Developed **front & backend features, API integrations** and **client-facing workflows** for a real-world financial markets platform.
- **Debugged** application issues across backend services and **client-facing features**, improving reliability through **testing and post-deployment test automation fixes.**
- **Automated** blockchain and financial data workflows, contributing to features from **initial design through deployment**.

Tech Services Intern May- Aug 2026 | *Toronto, ON*
Toronto Transit Commission(TTC)

- TTC is one of **North America's largest public transit** agencies, operating a large-scale technology environment.
- Supported **enterprise technology operations** across **software, hardware, and end-user systems.**
- Administered **device management and imaging workflows** using Microsoft Intune, Azure, and Samsung Knox.
- Improved **asset-tracking and access-managemen**t workflows using Jira and AssetSonar; **documented** technical processes and received a **return offer** six weeks into the term.

Tech Finance Intern May- Aug 2025 | *Toronto, ON*
Reckitt & Benckiser Canada

- RB is a **global Fortune 500 company** behind brands like Lysol, Dettol, Finish and Durex.
- Developed **Python and SQL** workflows to **transform, validate, and reconcile** financial reporting data.
- Built **reusable Excel VBA and Power Query solutions** to streamline recurring data preparation.
- Supported **Integrated Business Planning** with Finance and IT stakeholders; used SAP, Hyperion, and Power BI for **reporting and analysis.**
- **Documented** the most complex technical processes and was the **youngest** intern to get a **return offer** in the company.

Projects

AgentBench (AI Agent Evaluation Platform) | Python, FastAPI, React, TypeScript, PostgreSQL, Docker

- Built an evaluation platform for benchmarking LLM agents across tool-use, reasoning, and task-completion workflows.
- Developed automated evaluation pipelines to compare model accuracy, metrics and latency across test suites.
- Implemented experiment tracking and analytics dashboards to identify failure patterns and compare model performance.

CloudPulse (Distributed Job Processing System) | *Python · FastAPI · PostgreSQL · Redis · Docker · AWS · CI/CD*

- Engineered a distributed job-processing system with asynchronous workers, retry policies, and job-status tracking.
- Designed REST APIs and database workflows to support job submission, execution monitoring, and failure recovery.
- Containerized services and implemented automated testing and CI/CD to improve deployment reliability.

LedgerGuard (Fintech Quality & Data Platform) | *React · Node.js ·Playwright · Python · Docker · GitHub Actions*

- Built a full-stack financial operations platform using React, TypeScript, Node.js, and PostgreSQL to manage transactions, account balances, and transaction history.
- Developed Python and SQL data pipelines to validate transaction records, reconcile balances, and log processing errors.
- Implemented Playwright end-to-end tests, API integration tests, and GitHub Actions CI/CD to automate regression testing and verify critical workflows.
